ADDENDUM

to

THE MEMORANDUM OF UNDERSTANDING FOR A MULTI-LATERAL COLLABORATION

between

THE INSTITUTIONS AND FUNDING AGENCIES OF THE CTF3 COLLABORATION

concerning

THE CONTRIBUTION OF THE NATIONAL ACADEMY OF SCIENCES OF BELARUS TO THE CTF3 COLLABORATION

20/07/2012

CONSIDERING:

The Memorandum of Understanding ("the MoU") defining the framework applicable to the construction of a 3rd generation Compact Linear Collider Test Facility (CTF3) and the performance of Experiments to demonstrate the feasibility of key issues of the CLIC scheme;

That Article 1.2 of the MoU envisages Addenda defining each contribution pledged to the CTF3 Collaboration,

THE NATIONAL ACADEMY OF SCIENCES OF BELARUS REPRESENTED BY PROF. SERGEI KILIN, in its capacity as Member of the CTF3 Collaboration, **HEREWITH AGREES** to the following conditions for long term stays outside of Belarus for scientific and technical staff:

Any future collaboration item between the National Academy of Sciences of Belarus or an institute nominated by the academy will need to work into the very complex matter of particle acceleration with a two-beam scheme and hence has to send people for a coherent long period in order to work at CERN with the expert teams.
CERN provides for this purpose a framework program, called project associateship, which enables people employed by a foreign institute to work at CERN and to receive an allowance for additional living cost. This project associateship is limited to a maximum duration of three years.
By signing this addendum the National Academy of Sciences of Belarus agrees to abroad stays of scientists or technical staff for up to three years, whereby the duration and the detailed financial conditions of the stay will be a matter of approval by the National Academy of Sciences of Belarus after a proposal by CERN.

It should also be noted that the above project associateship is a standard procedure at CERN, which requires some formalities for scientists from non-member states and which in any case must assure, that the person has a valid employment contract with a local institute.

This Addendum shall form an integral part of the MoU.

Done in Geneva on:

For the NAS of Belarus,

Prof. Sergei Kilin
